

Artur Smiechowski

Bedford, MA 01730 | 802-417-1457 | Artur.Alex.Smiechowski@gmail.com | <https://dothwile.github.io>

Objective

Biomedical Engineer seeking a challenging role to grow, learn, and make an impact on science. Maker and tinkerer at heart.

Education

Worcester Polytechnic Institute - Worcester, MA

January 2026 - Present

M.S. Biochemistry - GPA: 4.0

University of Vermont - Burlington, VT

August 2018 - May 2022

B.S. Biomedical Engineering - GPA: 3.93

- Minors in Electrical Engineering and Mathematics
 - Honors Thesis on Medicated PVA Cardiac Patches
-

Technical Skills

C++, Java, C#, MATLAB, Simulink, Python, SPI, I2C, UART, JTAG

Machine Learning, TensorFlow, Scikit-Learn, PyTorch

Circuit Design and Analysis, RF Circuit Design, SMD Manufacturing

Bioinformatic Analysis, SolidWorks, Protein Assays, Human Cell Culture

Work Experience

Handyman, Freelancing

October 2024 - Present, Bedford, MA

- Performing maintenance and repairs on homes, automobiles, and electronics.

Embedded Software Engineer, HiArc

October 2022 - October 2024, Merrimack, NH

- Designed software in C++ and C# to control medical laboratory robotics for automation
- Collaborated with Systems Engineers to bridge software and hardware needs.
- Focused on embedded systems, computer vision, and signal processing.

Undergraduate Researcher, Engineered Biomaterials Research Lab / Glass Brains Lab

September 2020 - September 2022, Burlington, VT

- Performed biomaterial preparation and protein drug release assays.
- Collaborated with the drug designer to create the delivery vehicle.
- Collected and analyzed EEG data from patients in mental health studies.
- Investigated the correlation between mood and boredom using Scikit-Learn on EEG data.

Teaching Assistant / Electrical Engineering 101 / Biomedical Engineering 296

January 2021 - December 2021, Burlington, VT

- Oversaw microcontroller lab class. Assisted students with circuit design and programming.
 - Assisted students in a Brain-Computer Interfaces course using Python and Machine Learning libraries to filter and analyze large EEG datasets.
-

Honors and Awards

- UVM Dean's List 2018-2022
- NASA Vermont Space Grant 2021 - For Medicated Hydrogel Cardiac Patches
